

# Whisperwood – June 2009 News

## Women anglers lead the way!

The 2009 season is off to a terrific start and our season is well underway. Judy and Dee have our largest smallmouth and largemouth bass of the season and the largemouth and smallmouth bass population are numerous, fat, healthy and now as the spawning season winds down, these big predators will be settling in to their summer homes. The water temperature is warming near 70 degrees and June fishing should continue to be impressive. Already some outstanding

bass were caught, photographed and released back to Salmon and McGrath lakes and as an added bonus this year, the state has heavily stocked our lakes with hundreds of brook trout and many of our guests report the best trout fishing here ever!

Keep checking our webpage at:

<http://www.whisperwoodlodge.com/> and look in on our Big Bass page at:

[http://www.whisperwoodlodge.com/big\\_bass.htm](http://www.whisperwoodlodge.com/big_bass.htm) for each month. You can follow and view the great catches here at Whisperwood and our webpage also has plenty of information about other fun and interesting things to do in our area.

We hope you consider Whisperwood as your summer destination and keep watching the webpage for summer and weekend specials.

Booking your reservations early will insure getting the dates you want.

**Travel Reminder:** Those of you taking Interstate 295 off the Maine turnpike, please stay on the Maine turnpike, there is major construction on 295 with long delays expected.

Thank you,

Doug & Candee McCafferty
