

# Whisperwood – May 2011 Newsletter

## Big Bass make an early appearance

## Cabins available for Memorial Day weekend

Whisperwood opened Friday, May 13<sup>th</sup> and even though the weather did not start off well, the giant bass were catchable the first week of the 2011 season. Al and Judy (husband and wife) certainly had the biggest bass of the week!

When a 7 pounder and a 6 pound bass are caught opening week at Whisperwood Lodge & Cottages, you know something special could happen this year. We are still looking for that first 8 pounder, and who knows, maybe this will be the year - with the abundance of bait in Salmon and McGrath lakes, there are giant bass here for the catching.

With Memorial Day weekend fast approaching we still have some cabins available and if you would like the opportunity to try and catch your fish of a lifetime, please contact us. The weather is getting better by the day and the weekend forecast looks like warm weather is here and that means warmer water and those spawning bass will need to replenish their energies with lots of eating. You certainly want to be here when that post spawn feeding frenzy happens.

Please keep us in mind for your 2011 spring and summer vacation plans.

Thank you

Doug & Candee McCafferty
